“The landscaping of Crystal Falls is sculptural and architecturally dramatic...”

Crystal Falls Parkway Improvements

The Lookout Group Inc. has recently implemented extensive hardscape improvements to Crystal Falls Parkway. The design continues the old quarry theme utilizing massive limestone slabs from the Crystal Falls quarry and includes indigenous plants.

The Lookout Group Inc. is completing the excavation, rock placement and site work, and has retained Apache Graders, a local landscape firm, to install the indigenous plants. According to Adrianna Carrico, Apache Graders wants to enhance and showcase the magnificent Hill Country views. She says, “The landscaping of Crystal Falls is sculptural and architecturally dramatic and the median plant material and stone sculptures will reflect that. We feel there truly is a distinct style being created here within Crystal Falls that is completely unique and the Crystal Falls Parkway median will complement this Hill Country treasure.”
